MEHDI DAGDOUG

Last updated: October 2026

PRESENT POSITION

Assistant Professor, Department of Mathematics and Statistics, McGill University

Office: 1230 Burnside Hall, 805 Sherbrooke Street West, Montréal, Québec, Canada, H3A 0B9

E-mail: mehdi.dagdoug@mcgill.ca

Webpage: https://mehdidagdoug.github.io

Google Scholar: scholar.google.com/citations?user=LjZ0V7UAAAAJ

PERSONAL INFORMATION

Born on March 6, 1996

Nationality: French

Address: 219 Rue Maria, Montréal, Québec, Canada, H4C 0B5

Phone: +1 613 252 6185

EDUCATION

2019–2022: Ph.D. in Mathematics, Université de Bourgogne Franche-Comté.
Supervision: Camelia Goga (Université de Bourgogne Franche-Comté) and David Haziza (University of Ottawa).
Thesis: "Statistical learning for high-dimensional sampling", defended on July 12, 2022.

2017–2019: Master of Science in Statistical Modeling, option Research in Statistics, Université de Franche-Comté.

2014–2017: Bachelor in Mathematics, option Applied Mathematics, Université de Franche-Comté.

PROFESSIONAL EXPERIENCE

Assistant Professor — Aug 2023 – present
McGill University, Department of Mathematics and Statistics — *Montréal, Canada*
Tenure-track position.

Postdoctoral researcher in statistics — Nov 2022 – Jul 2023
University of Ottawa, Department of Mathematics and Statistics — *Ottawa, Canada*
Postdoctoral fellowship supervised by Professor David Haziza.

Attaché temporaire d'enseignement et de recherche — Sep 2022 – Oct 2022
Laboratoire de Mathématiques de Besançon — *Besançon, France*
Temporary teaching and research position at the Université de Franche-Comté.

Ph.D. student with teaching contract — Oct 2019 – Aug 2022
Laboratoire de Mathématiques de Besançon — *Besançon, France*
Ph.D. scholarship funded by the Région Bourgogne Franche-Comté and Médiamétrie. Research and teaching activities at the Université de Franche-Comté.

Research internship — Mar 2019 – Aug 2019
Laboratoire de Mathématiques de Besançon — *Besançon, France*
Master's thesis, "Model-assisted approaches and nonresponse in survey sampling", supervised by Professor Camelia Goga (Université de Bourgogne Franche-Comté).

Data scientist intern Apr 2018 – Aug 2018
Airbus *Toulouse, France*
Research and development on anomaly detection for avionics data with semi-supervised statistical learning models.

AWARDS AND HONORS

– 2023: Laureate of the first edition of the **Jean-Claude Deville Prize** of the French Statistical Society.

FUNDING HISTORY

– 2026–2029: **CANSSI Collaborative Research Team**, team member. Amount: $210,000 CAD. Title: "Statistical inference in survey sampling with machine learning methods".

– 2024–2029: **NSERC Discovery Grant**, principal investigator. Amount: $162,500 CAD. Title: "Statistical learning for high-dimensional survey sampling".

– 2024–2028: **Mitacs Accelerate**, co-investigator with David Haziza. Amount: $315,000 CAD. Title: "Statistical learning procedures for the treatment of unit and item nonresponse in surveys".

– 2023: **Start-up grant**, McGill University. Amount: $150,000 CAD.

RESEARCH AREAS

– Survey sampling theory: model-assisted estimation, high-dimensional asymptotic theory, variance estimation.

– Statistical learning and its applications to survey sampling and missing data.

– Model selection procedures and their applications to complex survey data.

PUBLICATIONS

Journal articles and preprints.

SUPERVISION

Current.

- Postdoctoral researchers:
  - Caleb Leedy, University of Ottawa. Aug 2025 – Aug 2027. Co-supervised with David Haziza. Working jointly with the Bank of Canada through a Mitacs grant.
- Ph.D. students:
  - Shengzhou Li, McGill University. Sep 2026 – present. Co-supervised with Tim Hoheisel.
  - Kalil Bouhadra, McGill University. Sep 2025 – present.
  - Ziming An, University of Ottawa. Aug 2023 – present. Co-supervised with David Haziza.
- M.Sc. students:
  - Xiao Qi Li, McGill University. Sep 2025 – present.
- Undergraduate students (McGill University):
  - Peter Buddle. Sep 2026 – present. Majors project (MATH 410). *Topic*: Central limit theorems in survey sampling.
  - Catherine Chen. Sep 2026 – present. Majors project (MATH 410). *Topic*: Concentration inequalities in survey sampling.

Former.

- M.Sc. students:
  - Evelyn Hubbard, McGill University. Sep 2024 – Jul 2026. Co-supervised with Abbas Khalili.
    Thesis: Linear regression under covariate shift and model misspecification: benefits and costs of importance weighting.
    Now: Ph.D. student, Université de Montréal.
  - Gulliver Hager, McGill University. Sep 2024 – Jul 2026.
    Thesis: Survey trees: from predictive performance to estimator efficiency for tree-based models adapted for model-assisted estimation in survey sampling.
    Now: Morgan Stanley.
  - Mila Pourali, McGill University. Jan 2025 – Jul 2026.
    Thesis: Asymptotic efficiency of the assumption-lean generalized regression estimator.

  - John Tsang, University of Ottawa. Aug 2023 – Jan 2025. Co-supervised with David Haziza. Working jointly with the Bank of Canada through a Mitacs grant.
    Thesis: Data integration for two-phase surveys.
    Now: Statistics Canada.

- Undergraduate students (McGill University):
  - Peter Buddle. May 2026 – Aug 2026. NSERC USRA summer research internship. *Topic*: Central limit theorems in survey sampling.
  - Rob Li. May 2025 – Aug 2025. NSERC USRA summer research internship. Co-supervised with Hui Shen (postdoctoral fellow at McGill). *Topic*: Differential privacy for survey data.
  - Rob Li. Jan 2025 – Apr 2025. Honours research project (MATH 470). *Topic*: Differential privacy.
  - Diego Urdapilleta de la Parra. Jan 2025 – Apr 2025. Majors project (MATH 410). *Topic*: Model selection and aggregation for regression.
  - Mila Pourali. May 2024 – Aug 2024. Honours research project (MATH 470). *Topic*: Foundations of semiparametric theory and missing data.
  - Xiao Qi Li. May 2024 – Aug 2024. Honours research project (MATH 470). *Topic*: Active statistical inference for finite population sampling.
  - Simon Savaria. May 2024 – Aug 2024. Honours research project (MATH 470). *Topic*: Resampling methods for variance estimation.
  - Yajun Hui. Sep 2023 – Dec 2023. Honours research project (MATH 470). *Topic*: Estimator selection for survey data.

- Visiting graduate students:
  - Enzo Abdallah-Herve, École Normale Supérieure Paris-Saclay. Apr 2024 – Jul 2024. *Topic*: Covariate shift problems in regression.
  - Kalil Bouhadra, École Polytechnique Fédérale de Lausanne (EPFL). Mar 2024 – May 2024. *Topic*: High-dimensional statistics with survey data.

PRESENTATIONS AT CONFERENCES AND SEMINARS

Plenary conference presentations.

2. Dagdoug, M. (2025). Estimation of uncertainty. Opening plenary address, *Annual Congress of the German Statistical Society*, Wiesbaden, Germany, 2–5 September 2025.
1. Dagdoug, M., Goga, C., & Haziza, D. (2023). Model-assisted estimation through random forests in finite population sampling. *12e Colloque International Francophone sur les Sondages*, Aubervilliers, France, 21–24 March 2023.

Short courses at conferences.

3. Dagdoug, M., & Haziza, D. (2026). Finite-population inference with ML-based predictions. Short course, *2026 Joint Statistical Meetings*, Boston, USA, 1–6 August 2026.
2. Dagdoug, M., & Haziza, D. (2026). Finite-population inference with ML-based predictions. Short course, *2026 SSC Annual Meeting*, Hamilton, Canada, 31 May – 3 June 2026.
1. Dagdoug, M., & Haziza, D. (2026). Finite-population inference with ML-based predictions. Short course, *14e Colloque Francophone International sur les Sondages*, Vannes, France, 19–22 May 2026.

Invited conference presentations.

19. Dagdoug, M., An, Z., Haziza, D., & Tillé, Y. (2026). Agnostic model-assisted estimation in finite population. *EcoSta 2026*, Kyoto, Japan, 8–10 August 2026.

18. Dagdoug, M., & Haziza, D. (2026). Machine learning for the treatment of nonresponse in surveys. *IVADO 2nd Workshop: Uncertainty in AI*, Montréal, Canada, 8–11 June 2026.

17. Dagdoug, M., & Haziza, D. (2026). Machine learning for the treatment of nonresponse in surveys. *2026 SSC Annual Meeting*, Hamilton, Canada, 31 May – 3 June 2026.

16. Dagdoug, M., & Haziza, D. (2025). Double machine learning for nonresponse in surveys. *EcoSta 2025*, Tokyo, Japan, 21–23 August 2025.

15. Dagdoug, M., & Haziza, D. (2025). On the use of machine learning methods for the treatment of unit nonresponse in surveys. *2025 Joint Statistical Meetings*, Nashville, USA, 2–7 August 2025.

14. Dagdoug, M., & Haziza, D. (2025). Double machine learning for nonresponse in surveys. *2025 CMS Summer Meeting*, Québec, Canada, 6–9 June 2025.

13. Dagdoug, M. (2024). High-dimensional variance estimation for model-assisted and imputed estimators. *Bank of Canada Workshop: Understanding and Correcting for Non-response Bias*, Ottawa, Canada, 9 December 2024.

12. Dagdoug, M. (2024). Variance estimation for survey estimators based on statistical learning models. *CANSSI-CRT Workshop on Modern Methods in Survey Sampling*, Ottawa, Canada, 8–10 July 2024.

11. Dagdoug, M., Eustache, E., & Haziza, D. (2024). High-dimensional variance estimation in survey sampling. *SIS 2024*, Bari, Italy, 17–20 June 2024.

10. Dagdoug, M., Eustache, E., & Haziza, D. (2024). Variance estimation for survey estimators based on statistical learning models. *ICSA-Canada Chapter 2024 Symposium*, Niagara Falls, Canada, 7–9 June 2024.

9. Dagdoug, M., Eustache, E., & Haziza, D. (2024). Variance estimation for survey estimators based on statistical learning procedures. *2024 SSC Annual Meeting*, St. John's, Canada, 2–5 June 2024.

8. Dagdoug, M. (2024). Variance estimation for survey estimators based on statistical learning procedures. *Séminaire en ligne sur les sondages*, France (online), 18 April 2024.

7. Dagdoug, M., & Haziza, D. (2023). Variance estimation for survey estimators based on statistical learning procedures. *16th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Berlin, Germany, 16–18 December 2023.

6. Dagdoug, M., Goga, C., & Haziza, D. (2022). Analysis of regression tree and random forest imputation in surveys. *Summer School on Modern Methods in Survey Sampling*, Ottawa, Canada, 5–8 July 2022.

5. Dagdoug, M., Goga, C., & Haziza, D. (2022). Model-assisted estimation through random forests in finite population sampling. *2022 SSC Annual Meeting*, Ottawa, Canada (online), 30 May – 3 June 2022.

4. Dagdoug, M., Goga, C., & Haziza, D. (2022). High-dimensional convergence for model-assisted estimators. *ITACOSM 2022*, Perugia, Italy, 8–10 June 2022.

3. Dagdoug, M., Goga, C., & Haziza, D. (2021). Random forests imputation in surveys. *2021 Joint Statistical Meetings*, Seattle, USA (online), 7–12 August 2021.

2. Dagdoug, M., Goga, C., & Haziza, D. (2021). Model-assisted estimation through random forests in finite population sampling. *Statistics 2021 Canada*, Montréal, Canada (online), 15–18 July 2021.

1. Dagdoug, M., Goga, C., & Haziza, D. (2020). Model-assisted estimation through random forests in finite population sampling. *13th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, England (online), 19–21 December 2020.

Contributed conference presentations.

11. Dagdoug, M., Eustache, E., & Haziza, D. (2023). High-dimensional model-assisted estimation for survey data. *2023 SSC Annual Meeting*, Ottawa, Canada, 28–31 May 2023.
10. Dagdoug, M., Goga, C., & Haziza, D. (2022). Random forests in surveys: from model-assisted estimation to imputation. *Journées de Méthodologie Statistique de l'Insee (JMS 2022)*, Paris, France, 29–31 March 2022.
9. Dagdoug, M., Goga, C., & Haziza, D. (2021). Random forests imputation in surveys. *Forum des Jeunes Mathématicien·ne·s*, Besançon, France, 8–10 December 2021.
8. Dagdoug, M., Goga, C., & Haziza, D. (2021). Model-assisted estimation through random forests in finite population sampling (presented with Camelia Goga). *11e Colloque International Francophone sur les Sondages*, Brussels, Belgium, 6–8 October 2021.
7. Dagdoug, M., Goga, C., & Haziza, D. (2021). Random forests imputation in surveys. *11e Colloque International Francophone sur les Sondages*, Brussels, Belgium, 6–8 October 2021.
6. Dagdoug, M., Goga, C., & Haziza, D. (2021). Convergence rates of model-assisted estimators in high-dimensional settings. *63rd ISI World Statistics Congress*, The Hague, Netherlands (online), 11–16 July 2021.
5. Dagdoug, M., Goga, C., & Haziza, D. (2021). Model-assisted estimation through random forests in finite population sampling. *Conference in honor of Fred Smith and Chris Skinner*, Southampton, England (online), 7–9 July 2021.
4. Dagdoug, M., Goga, C., & Haziza, D. (2021). High-dimensional asymptotics for model-assisted estimation. *6e Journée "Probabilités et statistiques Besançon–Dijon"*, Dijon, France, 5 July 2021.
3. Dagdoug, M., Goga, C., & Haziza, D. (2021). Model-assisted estimation through random forests in finite population sampling. *2021 SSC Annual Meeting*, Ottawa, Canada (online), 7–11 June 2021.
2. Dagdoug, M., Goga, C., & Haziza, D. (2021). Model-assisted estimation through random forests in finite population sampling. *52es Journées de Statistique de la Société Française de Statistique*, Nice, France (online), 7–11 June 2021.
1. Dagdoug, M. (2019). Imputation and calibration reweighting for surveys with missing data. *Sixième Journée des Jeunes Chercheurs en Mathématiques de l'UBFC*, Besançon, France, 12 April 2019.

Invited seminars.

10. Dagdoug, M. (2025). Statistical learning for finite population sampling: some challenges. *Statistics Seminar, University of Winnipeg*, Winnipeg, Canada, 7 March 2025.
9. Dagdoug, M. (2024). Statistical learning for finite population sampling: some challenges. *Séminaire de Probabilités et Statistique, Université de Franche-Comté*, Besançon, France, 16 December 2024.
8. Dagdoug, M., Goga, C., & Haziza, D. (2023). Statistical inference in surveys with random forest imputed estimators. *Séminaire de Statistique, Université de Sherbrooke*, Sherbrooke, Canada, 27 November 2023.
7. Dagdoug, M., Goga, C., & Haziza, D. (2023). Statistical inference in surveys with random forest imputed estimators. *Centre de Recherches Mathématiques (CRM), Applied Mathematics Seminars*, Montréal, Canada, 18 September 2023.
6. Dagdoug, M., Goga, C., & Haziza, D. (2023). Statistical inference in the presence of imputed survey data through regression trees and random forests. *Bank of Canada*, Ottawa, Canada, 6 June 2023.
5. Dagdoug, M., Goga, C., & Haziza, D. (2022). Imputation par arbres de régression et forêts aléatoires en théorie des sondages. *Séminaire de l'Institut de Statistique de Neuchâtel*, Neuchâtel, Switzerland, 28 April 2022.
4. Dagdoug, M., Goga, C., & Haziza, D. (2022). Analysis of regression tree and random forest imputation in surveys. *Séminaire des doctorants du Laboratoire de Mathématiques de Besançon*, Besançon, France, 3 March 2022.

3. Dagdoug, M., Goga, C., & Haziza, D. (2022). Analysis of regression tree and random forest imputation in surveys. *Séminaire des doctorants de l'Institut de Mathématiques de Bourgogne*, Dijon, France, 24 February 2022.

2. Dagdoug, M., Goga, C., & Haziza, D. (2020). Model-assisted estimation through random forests in finite population sampling. *Séminaire de l'équipe Probabilités et Statistiques du Laboratoire de Mathématiques de Besançon*, Besançon, France (online), 30 November 2020.

1. Dagdoug, M., Goga, C., & Haziza, D. (2019). Model-assisted estimation through random forests in finite population sampling. *Séminaire des doctorants du Laboratoire de Mathématiques de Besançon*, Besançon, France, December 2019.

TEACHING

Current, McGill University (2026–2027).

- MATH 598, Topics in Probability and Statistics: *Asymptotic Statistics* — Fall 2026
- MATH 324, *Statistics* — Winter 2027
- MATH 410, Majors projects (2 projects) — Fall 2026

Past, McGill University.

- MATH 525, *Sampling Theory and Applications* — Winter 2024, Winter 2025, Winter 2026
- MATH 533, *Regression and Analysis of Variance* — Fall 2023, Fall 2024, Fall 2025
- MATH 324, *Statistics* — Winter 2026
- Supervised projects: MATH 470 (5 projects), MATH 480 (1 project), MATH 410 (1 project) — 2023–2025

Invited courses, Université de Franche-Comté.

- Research course in statistics: *Matrix completion and missing data*, Master 2 (15 hours) — December 2024
- Research course in statistics: *Matrix completion*, Master 2 (15 hours) — December 2022

During the Ph.D., Université de Franche-Comté.

- *Survey sampling*, Master 2: exercise and coding sessions (12 hours per year), then lectures (18 hours) — 2020–2023
- *Statistical learning*, Master 2: exercise and coding sessions (6 hours) — 2021
- *Python*, Master 2: exercise and coding sessions (6 hours per year) — 2020–2022
- *Object-oriented programming*, Master 1: lectures, exercise and coding sessions (15 hours per year) — 2019–2021
- *Advanced R*, Master 1: lectures and coding sessions (12 hours per year) — 2019–2021
- *Elementary statistics*, Bachelor of Mathematics, 3rd year: coding sessions and final projects (25 hours) — 2022
- *Mathematical tools*, Bachelor of Biology, 1st year: lectures and exercises (40 hours, then 20 hours) — 2019–2021

Lecture notes.

- *Linear Regression and Analysis of Variance*, McGill University, 302 slides.
- *Survey Sampling Theory*, McGill University, 236 slides.

RESEARCH VISITS

- Université de Neuchâtel, Neuchâtel, Switzerland, May 2022, two weeks, at the invitation of Professor Yves Tillé.

ADMINISTRATIVE RESPONSIBILITIES

Current.

- Sep 2026 – present: Committee member, *Committee of Graduate Affairs*, McGill University.
- Jul 2026 – present: Secretary, *Data Science and Analytics Section*, Statistical Society of Canada.
- Jul 2026 – present: Member, *Pierre Robillard Award Committee*, Statistical Society of Canada.
- Sep 2025 – Jun 2028: Member, *New Investigators Committee*, Statistical Society of Canada.
- Jul 2024 – Jun 2027: Committee member, *Student Travel Grants Committee*, Statistical Society of Canada.

Past.

- Aug 2023 – Aug 2026: Committee member, *Committee of Undergraduate Affairs*, McGill University.
- Sep 2025 – Feb 2026: Committee member, *Statistics Search Committee*, McGill University.
- Oct 2025: Committee member, *Fellowships Evaluation Committee for the 2025 NSERC Canada Graduate Research Scholarships – Doctoral (CGRS D)*.
- Mar 2025: Committee member, *NSERC CGS Masters Selection Committee 2025–2026*.
- Nov 2024 – Feb 2025: Evaluation committee member, *FRQNT Ph.D. grants*, category Probability and Statistics.
- Mar 2024: Committee member, *NSERC USRA and SURA Summer Research Awards Ranking Committee*, McGill University.
- Sep 2023 – Dec 2023: Committee member, *Statistics Search Committee*, McGill University.
- Feb 2021 – Oct 2022: Elected member, *BFC-Maths Federation*, representing Ph.D. students of the Laboratoire de Mathématiques de Besançon.
- May 2020 – Oct 2022: Elected member, *Carnot Pasteur Doctoral School*, representing Ph.D. students in mathematics.

SCIENTIFIC ORGANIZATION

Current.

- Aug 2023 – present: Organizer of the *McGill Statistics Seminar*; sole organizer from 2023 to 2026, co-organized with Ameer Dharamshi since 2026–2027 (18 seminars in 2024–2025, 17 in 2023–2024).

Past.

- Feb 2025 – May 2026: Member of the scientific committee, *14e Colloque Francophone International sur les Sondages*, Vannes, France.
- 2022: Co-organizer, with Valentin Petit (LmB), of the *Septième Journée des Jeunes Chercheuses et des Jeunes Chercheurs en Mathématiques de l'UBFC* (50 participants).
- 2020–2022: Co-organizer, with Valentin Petit (LmB), of the *Ph.D. seminar* of the Laboratoire de Mathématiques de Besançon (15 seminars in 2020–2021, 14 in 2021–2022).
- 2021: Member of the organizing committee and webmaster, *Forum des Jeunes Mathématicien·ne·s 2021* (3 days, 70 participants). https://jmb2021.sciencesconf.org.

REFEREEING AND EDITORIAL ACTIVITIES

Editorial work.

- Sep 2025 – present: Editor of the "Early Career Survey Statistician" section of *The Survey Statistician*.

Refereeing for journals.

- Canadian Journal of Economics.
- Canadian Journal of Statistics.
- Computational Statistics.
- Electronic Journal of Statistics.
- Journal of Data Science.
- Journal of Official Statistics.
- Journal of Statistical Planning and Inference.
- Journal of Survey Statistics and Methodology.
- Sankhya B.
- Survey Methodology.

INTERACTIONS WITH INDUSTRY

- CANSSI Collaborative Research Team with the Bank of Canada and Statistics Canada as supporting industrial and governmental partners.
- Collaboration with the Bank of Canada through a Mitacs project, including the co-supervision (with David Haziza) of one Ph.D. student, one M.Sc. student and one postdoctoral fellow working with the Bank of Canada.
- Collaboration with the French company Médiamétrie during my Ph.D., including the application of the methodology of "Model-assisted estimation through random forests in finite population sampling" to real data collected by Médiamétrie.
- Participation in the *Semaine d'Étude Maths-Entreprises* (SEME), Besançon, 2019, with Fabio Coppini (Università di Firenze) and Émile Parolin (INRIA Saclay), for the Centre Georges-François Leclerc (regional cancer center) in Dijon. This work resulted in a Python module and a report, "First steps in image registration".

OUTREACH

- "Missing data treatment in surveys", presentation for *Soup and Science*, Montréal, February 28, 2024.
- "Treatment of missing data in surveys", short talk introducing research to undergraduates, *Undergraduate Research Panel*, Montréal, January 22, 2024.
- "Les sondages : comment ça marche ?", talk for the final of the *Rallye mathématiques des collégiens*, Dijon, June 2, 2022.
- "Titanic, entre expédition maritime et promenade en forêts aléatoires", talk for the final of the *Rallye mathématiques des lycéens*, Dijon, June 2, 2022.
- "Titanic, entre expédition maritime et promenade en forêts aléatoires", popularization workshop for the *Journée de la recherche en mathématiques*, Besançon, November 17, 2021.
